

Reflective Lantern - Daily Report

Project

Repository: [Supplier-Invoice-Dashboard-Payments-Tax-Overview](https://github.com/atharvadevne123/Supplier-Invoice-Dashboard-Payments-Tax-Overview)

URL: <https://github.com/atharvadevne123/Supplier-Invoice-Dashboard-Payments-Tax-Overview>

Date: 2026-07-10

Commits: 60

Changes Made (16)

- 6 new analytics endpoints + 3 report endpoints + CSV export
- Bulk import: JSON array and raw CSV body endpoints
- PUT /invoices/{n}/payment; PATCH auto-derives payment status
- GET /suppliers, /business-units, /cache-stats
- Global per-IP rate limiting wired app-wide
- Registered previously-unwired exception handlers
- DB-level pagination (was loading all rows per request)
- Lifespan migration, exception chaining, mid-file `__main__` fix
- Docker + compose healthchecks; X-Response-Time header
- invoice_size_distribution + supplier_payment_performance analytics
- Seeder --count/--force flags; CLI dashboard new sections
- mypy config, CI matrix 3.11/3.12 + format check + mypy job
- README/CHANGELOG overhaul; version bump 1.1.0
- 90 new tests (337 total); untracked committed .pyc files
- NOTE: push to repo blocked by git proxy - 60 commits saved in
- reflective-lantern/pending/ as .bundle and .patch for replay

Test Status

PASS - 337 tests passing
