

Reflective Lantern - Daily Report

Project

Repository: Cyber-Sentinel

URL: <https://github.com/atharvadevne123/Cyber-Sentinel>

Date: 2026-07-08

Commits: 60 (local; push blocked - see notes)

Changes Made (60 commits)

Built full ML project from empty repo (60 atomic commits)

XGBoost/LightGBM/RandomForest soft-voting ensemble, 5-fold stratified CV

KS-test sliding-window drift monitor (fixed results-accumulation bug)

FAISS flat-L2 attack pattern matcher with graceful fallback

FastAPI: /api/v1/predict, /predict/batch, /health, /metrics, /version

Pydantic v2 validation, rate-limit + correlation-ID middleware

PredictionService layer, custom exception handlers, JSON logging

Airflow retrain DAG with drift-triggered branching

171 passing tests across 14 modules; ruff clean

CI, release, and Bandit security workflows; Docker + PostgreSQL compose

Alembic, Makefile, pre-commit, pyproject, full docs suite + MIT license

IMPORTANT: push to Cyber-Sentinel was BLOCKED by the session git proxy
(repo not in session's authorized set; add_repo tool unavailable).

All 60 commits are preserved in the reflective-lantern repo:

pending/Cyber-Sentinel-2026-07-08.bundle (git bundle)

pending/Cyber-Sentinel-2026-07-08.patch (format-patch series)

To apply: git clone Cyber-Sentinel && git pull <bundle> main && git push

Also completed pre-flight: fixed failing CI in 5 repos (bad action
versions, release workflows), merged 5 stale branches.

Test Status

PASS (171 passed, 6 skipped - FAISS optional)
