Reflective Lantern - Daily Run Report

Date: 2026-10-16 | Mode: IMPROVEMENT | Repo: atharvadevne123/reflective-lantern

Run Summary

Mode:	IMPROVEMENT
Total Commits Pushed:	61
Ruff Check:	PASSED (0 errors)
Ruff Format:	PASSED
Branch:	main
Push Status:	SUCCESS

Changes Made

fix(ci): Renamed duplicate test function names to pass ruff F811

fix(ci): Fixed SIM108 ternary, B007 loop var, B023 lambda closure in test files

style: Applied ruff format to all source files

docs: Added class docstrings to DRPayload and SolarEconomicsPayload

chore: Added dev/test comment separator in requirements.txt

chore: Added check and ci Makefile targets

test: Added parametrized tests to 40+ test files across the codebase

Covered: test_stats_utils, test_geo_utils, test_time_series, test_trend_analysis, test_solar, test_tariff, test_carbon, test_load_profile, test_battery, test_forecasting, test_monitoring, test_alerting, test_similarity, test_regions, test_anomaly, test_data_quality, test_validation, test_date_utils, test_investment, test_market_context, test_reporting, test_energy_export, test_features, test_notifications, test_pipeline_utils, test_power_quality, test_demand_response, test_weather_normalization, test_cost_estimator, test_energy_benchmark, test_cache, test_rate_limiter, test_compression, test_batch, test_api, test_model, test_middleware, test_config, test_pipeline, test_correlation_id, test_data_versioning, test_experiment_tracker, test_model_registry, test_feature_store, test_faiss, test_data_augmentation, test_aws_stub, test_webhook_handler, test_audit_log

Pre-flight Notes

* PRE-FLIGHT 1 (CI Fix): Fixed ruff F811/SIM108/B007/B023 failures; CI workflow now passes.
* PRE-FLIGHT 2 (Merge branches): GitHub API scope limited to reflective-lantern; skipped.
* PRE-FLIGHT 3 (Create releases): GitHub API scope limited to reflective-lantern; skipped.
* Docker workflow: May still fail at image build step (no Docker daemon in environment).
